## Class Descriptions

\*Classes are in order by level of difficulty

- **Functional Mobility:** A 30-minute stretching and mobility class meant to ease movement and increase range of motion in a functional way. Combining Yoga postures with athletic stretching and common physical therapy modalities, functional Mobility will help you move more freely.
- **Silver Sneakers Stability:** Get stronger and improve your balance through exercises that strengthen the ankle, knee and hip joints all in a fun and social setting. This class is designed specifically for fall prevention.
- **Friday Flow:** This revitalizing morning flow is a Mind-Body Movement class that connects movement with breath. Increase flexibility, improve mental focus and clarity, reduce anxiety and stress, and boost mood and energy. All levels are welcome!
- **Strong & Stable:** A functional strength class designed to improve muscle strength, balance, and stability for everyday life. Exercises focus on movements that support activities of daily living such as standing, walking, lifting, and reaching. This class is performed standing and seated, with options to match individual ability levels. Participants will **not** be required to get up and down from the floor. Perfect for those looking to build confidence, maintain independence, and move safely with strength and control.
- **MX4 Active:** A 45-minute moderate intensity session designed to offer members a non-intimidating workout focused on:
  - enhancing stability to aid rehabilitation and reduce the risk of fall
  - building functional strength to reduce the risk of injury and maintain independence
  - flexibility for improved range of motion and greater freedom of movement
  - improving cardiovascular health for increased energy and quality of life
  - while providing personal coaching and attention from a certified instructor
- **Functional Strength:** Focuses on exercising several muscles and joints together rather than working with a particular muscle or group of muscles independently, resulting in an individual being able to perform activities of daily living with greater ease. Build strength and confidence! Suitable for all fitness levels.
- **MX4:** A 30-minute moderate/high-intensity, motivating exercise experience that delivers results. Only MX4 combines best-in-class training tools with exciting workouts to help you improve cardiovascular fitness, power, strength, and endurance in a way that's right for your body and abilities. Whether you're striving to shed a few pounds, enhance performance, or improve overall fitness, MX4 will help you achieve more challenging progressive workouts.
- **MX4 Plus:** A 45-minute moderate/high-intensity, motivating exercise experience that delivers results. Built on the 4 pillars of MX4 -Cardio, Power, Strength and Endurance - MX4 Plus combines best-in-class training tools with challenging workouts to help you reach your goals faster in a way that's right for your body and abilities.
- **Total Body Strength:** A comprehensive workout designed to target all major muscle groups in a single session. This type of workout is ideal for building balanced strength, improving muscular endurance, and enhancing overall fitness. This class is suitable for most fitness levels. Must be able to move pain free and get up and down off the floor.
- **Strength Split:** A strength-focused split program emphasizing upper, lower, and core training to develop balanced, athletic strength while reinforcing proper lifting technique, confidence, and control. This class is intended for individuals who can move pain-free and are able to safely get on and off the floor; it is not suitable for those with current movement limitations or injuries.
- **Cardio Conditioning:** A high-energy conditioning class focused on building cardiovascular endurance using total-body exercises performed at sustained or interval-based intensities.
